State of the Gaza Strip Border Crossings
01 – 28 February 2022

For 15 years, the Israeli occupation authorities continue to impose illegal and inhuman closure on the Gaza Strip in February, leading to a catastrophic deterioration of the humanitarian conditions of 2 million Palestinians living in the Gaza Strip, which is the most densely populated area in the world.

The Israeli closure deepened the humanitarian and living crises of thousands of families in the Gaza Strip, as more than half of the Gaza population lives in poverty as the poverty rate reached 53%. Also, the Gaza unemployment rate reached 47% (i.e., 230,100 are unemployed), 74% of whom is among youth. Meanwhile, more than 68.5% of the Gaza population suffer from food insecurity.

As for commercial crossings, the occupation authorities maintain unprecedented restrictions on the import of thousands of goods into the Gaza Strip, including construction materials necessary for the reconstruction of what was destroyed by the latest Israeli offensive in May 2021, and the equipment and materials needed to repair the massive damage caused to the water and sanitation facilities and electricity networks by the offensive. Moreover, IOF continued to impose tightened restrictions on the entry of 62 items classified as "dual-use items" that include hundreds of major goods and essential materials, which are essential for the population. The ban on the entry exacerbates the Gaza Strip’s crises across various sectors, including infrastructure, economic, health, and education.

In terms of individuals’ movement, the Israeli occupation authorities continue to impose tight restrictions on limited groups that were allowed passage after a thorough security check. Even though the Israeli occupation authorities declared they will allow patients’ travel, they refused to respond to dozens of permit requests applied by the Health Ministry’s Coordination and Liaison Department on behalf of patients with serious health conditions.  

---

3 Israeli authorities claim that these items, although used for civilian purposes, could be used to develop the combat capabilities of the Palestinian armed groups.
diseases, whose treatment is not available at the Gaza hospitals, and referred abroad for treatment in the hospitals in Israel and the West Bank, including occupied Jerusalem.

Restrictions on the Movement of Persons:

- Patients: In February, the Palestinian Ministry of Health decreased the number of referred patients to the extent possible and only referred patients of serious cases. However, the Israeli authorities obstructed the travel of 443 patients out of 1,445 patients (i.e., 30.6% of the total permit applications), who were referred for treatment in Israeli hospitals or in the West Bank hospitals, including occupied East Jerusalem.

The Israeli authorities rejected 10 applications for security reasons (0.69%); did not reply to 25 applications (1.73%); delayed replies (under review) to 380 permits (26.3%); asked 2 patients to change their companion (0.14%); and asked 3 patients to book a new appointment in a new hospital (0.21%).

4 GACA Data
• The Israeli authorities continued to impose restrictions on items that can be carried by travelers via Erez, primarily no electronic and electric devices, food, and cosmetics are allowed, as well as wheeled luggage.

• According to GACA February data, Israeli authorities allowed 26,084 Palestinians to exit the Gaza Strip via “Erez” Crossing, including 1200 patients and 709 for personal needs, 22,280 businesspeople, 337 businesspeople who hold “BMC” permits, 399 foreign international organizations’ staff, 149 from Arabs holding Israeli ID cards; and 30 travelling via King Hussein Bridge. Meanwhile, 26,056 were allowed entry to the Gaza Strip, including 966 patients and 687 persons for personal needs, 22,369 businesspeople, 239 businesspeople who hold “BMC” permits, 410 foreign international organizations’ staff, 187 King Hussein Bridge, 178 Arabs holding Israeli ID cards, and 1 released prisoner, and 7 persons who were detained within the Gaza sea or the border area.

• **Prisoners’ Visits:** In February, the Israeli authorities banned family visits to Palestinians in Israeli prisons. This violates the right of detainees to be in contact with their families through family visits, which is a fundamental right under

international law, including the Fourth Geneva Convention, under which Article 116 says that every internee shall be allowed to receive visitors, especially near relatives, at regular intervals and as frequently as possible, particularly in cases of death or serious illness of relatives.

Restrictions on Movement of Goods

- The Israeli authorities continued to impose tightened restrictions on the list of items classified as “dual-use.” The dual-use items include 62 types and hundreds of goods and commodities that are essential to the life of the population. Imposing these restrictions caused infrastructure, economy, healthcare, and education to deteriorate severely. These items include communications equipment, pumps, big generators, iron bars, iron pipes in all diameters, welding equipment and welding rods, various types of wood, UPS devices that protect the electric devices from breaking down when the electricity suddenly cuts off, X-ray machines, cranes and heavy vehicles, elevators, types of batteries and several types of fertilizers.

- Israel maintained tightened restrictions on the entry of goods into the Gaza Strip. In February, they allowed the entry of 8466 truckloads via “Karem Shalom” border crossing, including 272 humanitarian aid truckloads, 427 fuel trucks and 5949 truckloads of goods for the private sector as reported by the Ministry of National Economy in Gaza.

- During the reporting period, 1818 truckloads entered via Rafah Crossing, including 577 fuel truckloads and 1241 truckloads of goods for the private sector.
• The process of submitting applications by the Gaza Strip residents to import goods classified by the Israeli authorities as "dual-use items" is very complex and ambiguous. A person from the Gaza Strip should send a request to the Palestinian Coordination Committee for the Entry of Goods, which refers the request to the Israeli Coordination and Liaison Office at "Erez" Crossing. Afterwards, the goods are classified and sent to the relevant Israeli officer to examine it. Moreover, the Palestinian merchant must complete the transaction with the Israeli seller or broker and pay for it in full as a first step towards submitting a request for import. If the response is positive, the coordination for the entry of goods is allowed through the Karm Abu Salem crossing. A number of merchants and contractors said to PCHR that the abovementioned measures are very complicated as the Israeli authorities deliberately delay responses to applications for months. Additionally, in many cases, the Israeli forces stationed at (Karm Abu Salem crossing return the goods that had been already approved entry. This inflicts heavy losses on merchants who pay large sums of money for the storage and demurrage charges and to contractors who are legally obliged to deliver their orders on time.
• **Gaza Strip exports:** Israeli authorities continued to ban the Gaza Strip exports. However, in a limited exception, they allowed the export of very limited types of goods; most of which are exported to the West Bank and the rest are exported to Israel and other countries. In February, the Israeli authorities allowed the export of 793 truckloads (513 to the West Bank, 258 to Israel, and 22 truckloads abroad) according to the Ministry of National Economy. Those truckloads included agricultural products, fish, furniture, animal skin, aluminum scrap, clothes, and furniture. The exports during the reporting period constitute only 17.6% of Gaza’s total monthly exports before closure was imposed in June 2007 (4500 truckloads/month).
**Movement at Rafah Border Crossing:** According to the Crossing and Borders Authority in Gaza, in February, 9868 persons traveled from the Gaza Strip while 10126 persons returned to the Strip. Travelers returning to the Gaza Strip via Rafah Crossing suffer from prolonged, recurrent, and unjustified searches.
